For some people 16ch is not enough?
No problem for myMix

e.g. drummer wants to have all drum mics individually.

Use 1 myMix for all drum channels and send this mix to the network (Stereo Mix Drums)

myMix

16 channels is not enough ?

Use two myMix units.
Select up to 16 at the first, send mix to network,
select this mix on the 2nd myMix and add the
other channels –
That allows now up to 30 channels for individual
control
